### **Course Overview**

This five-day Level 2 Cardiac MRI teaching workshop is directed at Cardiologists, Radiologists and Nuclear Medicine Physicians, who wish to achieve Level 2 SCMR accreditation. The content has been specifically designed to satisfy 50% of the Level 2 requirements, including 25 live CMR cases and an additional 50 CMR cases manipulated on workstations with supervision by teaching faculty.

The course covers a wide variety of clinical material ranging from myocardial viability, perfusion, cardiomyopathy imaging, as well as valvular heart disease, pericardial disease and congenital heart disease. The course is clinically relevant and makes comparison with other imaging modalities including coronary angiography and echocardiography.

### **Certificate of Proficiency**

Attendees will be awarded a Certificate of Proficiency that includes the mentored number of cases reviewed, for use in credentialing which can contribute to the case requirements of clinical competence in CMR specified by the ACFC/AHA/SCMR. Together with evidence of clinical exposure of CMR, attendees can submit application to SCMR for Level 2 accreditation.
